Wine Festival Schedule

The Aguillar Family is hosting their annual wine festival and they have asked you to build a web page for the event schedule! Use your knowledge of HTML to display a table to the attendees.

You can preview the final version [at this link](#).

Let's begin!

If you get stuck during this project, check out the **project walkthrough video** which can be found at the bottom of the page after the final step of the project.

1.
In **index.html**, inside of the `<div>` with class `container`, create a new `<table>` element.

2.
Inside of the `<table>` element, add a section for table headings using `<thead>`.

Then, add two rows inside of it using the *table row* element.

3.
Inside the first table row element, from task 2, add a *table heading* element.

Inside of that, include an `<h1>` with the following text: `Wine Festival Schedule`.

4.
Inside the second table row element, from task 2, add two `<th>`s:

- In the first, add an `<h2>` that says `Time`.
- In the second, add an `<h2>` that says `Event`.

5.
You may notice that "Wine Festival Schedule" does not stretch across the entire table. Let's fix that!

In the opening `<th>` tag of this element, add `colspan="2"`.

6.
Below the closing `</thead>` tag, section off the table using the *table body* element.

7.
Inside of the table body you created in the previous task, create 5 rows using the *table row* element.

8.

Inside each row, create two cells using the *table data* element.

The first table data in each row should have the class `left`.

9.

Inside each of the 5 `<td class="left">`elements, add `<h3>` elements that include the times of the events:

- `12:00 PM`
- `01:00 PM`
- `02:00 PM`
- `03:00 PM`
- `04:00 PM`

Feel free to look back at the [live site](#) to compare.

10.

Inside each of the `<td>` element that does not have class `left`, add `<h3>` elements that include the name of events:

- `Welcome Reception`
- `Storytelling & Tasting`
- `Wine Luncheon`
- `Aguillar Family Wines`
- `Wine & Cheese Tasting`

You have created the events table. Cheers!
